

Dignity Health Partners, St. John's Ventura: Hany Fouad, MD

Less time charting means more patient interaction

Charting hours
**+ 10 hours saved
per week**

Patient visits
**+ 4 patient visits
per day**

Before Augmedix:

Struggling to keep up with his documentation

Dr. Fouad is a busy Family Medicine physician who used to see 25 patients per day. Despite his best efforts, he was struggling to keep up with his documentation, typically spending 6-7 hours per week completing patient notes. He was growing increasingly dissatisfied with the amount of time he spent on data entry. His EHR had come between him and his patients.

After Augmedix:

Dramatic gains in productivity and efficiency

Since starting with Augmedix, Dr. Fouad has experienced dramatic gains in productivity, efficiency, and professional satisfaction. His patients' care is documented with greater accuracy and detail than he previously achieved, yet he spends less than one half-hour each day reviewing his notes. After a full day – typically 30 patients – he truly leaves work at work, and is able to spend his reclaimed time with his family.

"I cannot imagine my career without Augmedix."

– Hany Fouad, MD
